DIRGE FOR A SOLDIER

As man may, he fought his fight,
Proved his truth by his eccleator
Let him sleep in solenn hight,
Sleep foreter and forever.
Lay him low, lay him low,
In the clover or the snow!
What-cares he? he cannot know
Lay him low?

Fold him in his country's stars,
Roll the drum and fire the volley!
What to him are all our way.
What but death-hemocking folly's
Lay him low, lay him low,
In the clover or the snow!
What cares he? he cannot know:
Lay him low!

Lay nun one.

### Decline In Birthrate Is Only Remaining Protection Against World War

THE ten million killed—the thirty million maimed—and the millions of families broken up to the injury of the birth rate, by the World War—has created a condition which causes every European nation to stop and count the cost of another World War before breaking the peace of

Since the Armistice-(with the exception of Russia, and the partial exception of Italy)—there has not been in any nation of people classed as white people, an in-crease in birth rate sufficient to remove the injury during the war years to the conditions of child-bearing and child-

Assuming that conditions do not get worse, the actuaries adopt as a basis for reaconable consideration the calculations that in fifty years the population of Great Britain will not exceed thirty million people; France twenty-eight million; Germany forty-five million.

Should the disaster of another World War be added to the conditions now decreasing the birth rate, not more than twenty-five years will have passed before the white races will have become minor tribes among the peoples of

These facts are known to all European leaders and constitute the one remaining protection against World War. Not even the most paranoic of dictators can fail to realize that world war means white race destruction; and that no white race (Russia excepted) can escape shrinking in numbers toward extinction from the day another World War commences. Russia is excepted because there is more of the Asiatic than the European to work on in Russia; and because the age of production for a greater production is each constitution. population is only opening in Russia.

It is not likely that any political leader in Canada, has any knowledge of the facts above set forth—or he would not passively take part in shutting up the great north-western empire of Canada which, given means of transportation at a very moderate cost, is capable of bringing about an inferease in the number of British-born people at least equal to the shrinkigge in birth rate in the United Kingdom. This is the most acute problem in the white
